The Chaise Longue

This "long chair" has become a mainstay of large living rooms where an extra sofa would overwhelm and a bench might seem incidental. Designers are using them in other rooms where indulgent seating seems appropriate—master suites, garden rooms, libraries—and taking advantage of their sinuous silhouettes to add softness and style. ♦

Lynn Ellen chaise (\$2,995) by O. Henry House, to the trade, 335/431-5350.

"Chaise longues have stronger design elements and more style than benches, so they bring interest to a space."

—S. Joanne Kasper, Atlanta designer

Atter chaise (\$2,632) designed by Randy Culler for Brownstone by Council, 336/859-2155.

"A chaise is ideal for extra seating in a living room, but the most luxurious use is for comfort in a bedroom."

—William P. Eubank, Memphis and Palm Beach designer

Tufted chaise (\$1,472) by Lee Industries, 800/892-7150.

"I have a large, overstuffed, velvet-covered chaise in my family room, and it is the most sought-after seat in the house."

—Fiona Newell Weeks, Maryland designer
